**DETAILED ACTION**

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art, either singularly or in combination. According to the invention, a multimedia output device includes an interface for receiving content, such as audio or video content, and a content processing system coupled to the interface to receive the content. The content processing system, in turn, includes an encryption module that performs the encryption functionality. In one embodiment, the encryption module generates a key and encrypts the content using the generated key. In another embodiment, the encryption module encrypts the received content using a key provided by the user. The encryption module executes a key and metadata generation module, which is adapted to receive unencrypted content and to generate various levels of description of the content in response to a user's selection of a security level. Such a description includes keywords, key frames from a video, or just a title.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
